

TIRTH BHATT

Full-Stack Developer

Rajkot, Gujarat, India | 8780874975 | work.tirth1208@gmail.com

LinkedIn: [linkedin.com/in/tirth-bhatt1208](https://www.linkedin.com/in/tirth-bhatt1208) | GitHub: github.com/TirthBhatt1208 | Portfolio: <https://tirthbhattportfolio.vercel.app>

PROFILE

Computer Engineering student with strong full-stack development experience across React, Next.js, Node.js, and Express, with hands-on cloud deployment and Docker experience. Solid foundation in Data Structures & Algorithms and problem-solving; currently exploring Generative AI and LLM-based application development.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database: PostgreSQL, MongoDB, Prisma ORM

Cloud & DevOps: Docker, AWS EC2, GitHub Actions (CI/CD), Git

Other: WebSockets, FFmpeg, BullMQ, Redis, JWT Authentication, Clerk, TanStack Query

PROJECTS

VideoFlow | Adaptive Video Streaming Platform (<https://github.com/TirthBhatt1208/Videoflow>)

- Engineered a scalable video streaming platform using React.js and Express.js with adaptive playback across varying network conditions
- Built an asynchronous background processing pipeline with BullMQ, Docker, and FFmpeg to handle HLS transcoding, thumbnail generation, and metadata extraction
- Designed a PostgreSQL + Prisma database schema and integrated Cloudinary for optimized media delivery
- Implemented real-time processing status updates using WebSockets and Redis Pub/Sub
- Containerized the full application with Docker and deployed to AWS EC2 with an automated CI/CD pipeline via GitHub Actions

Tech Stack: React, Express, TypeScript, BullMQ, Docker, Redis, FFmpeg, PostgreSQL, Prisma, Websocket, AWS

VibeStudio | AI-Powered Prompt-to-Code Platform (<https://github.com/TirthBhatt1208/VibeStudio> <https://vibe-studio-five.vercel.app/>)

- Developed an AI-powered UI generation platform using Next.js and the Google Gemini API to convert natural-language prompts into deployable full-stack web applications
- Implemented secure authentication, subscription tiers, and billing workflows using Clerk
- Built a scalable backend with Prisma ORM and PostgreSQL, using TanStack Query for client-state synchronization and Inngest for background job orchestration
- Integrated E2B Sandbox to safely execute AI-agent-generated code in isolated environments

Tech Stack: Next.js, Clerk Billing, TanStack Query, Shadcn/UI, Inngest, E2B Sandbox, Prisma, PostgreSQL, Google Gemini

VideoTube | Video Platform Backend API (<https://github.com/TirthBhatt1208/VideoTube>)

- Built a production-ready REST API with 8 feature modules (users, videos, playlists, comments, likes, subscriptions, community posts, analytics) following MVC architecture with centralized error handling
- Implemented JWT authentication with refresh token rotation for secure session management
- Built a secure file upload pipeline using Multer and Cloudinary for video and image asset handling

Tech Stack: Express, MongoDB, JWT, Multer, Cloudinary

EDUCATION

V.V.P Engineering College, Rajkot — Bachelor of Engineering, Computer Engineering

2023 - 2027 | CGPA: 8.00 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Earned a Generative AI certification from Udemy, demonstrating hands-on learning in Generative AI and LLM-based application development.
- Collaborated in a 4-member team to design and deliver a working product within a hackathon timeframe
