

TIRTH BHATT

FULL-STACK DEVELOPER

CONTACT

- 8780874975
- work.tirth1208@gmail.com
- Rajkot , Gujarat , India
- [LinkedIn](#)
- [GitHub](#)
- [Portfolio](#)

EDUCATION

- 2023 - 2027
- V.V.P ENGINEERING COLLAGE
- Bachelor of Engineering
- CGPA: 8.00

SKILLS

- Languages:** JavaScript, TypeScript, Python, SQL
- Frontend:** React.js, Next.js, Tailwind Css
- Backend:** Node.js, Express.js
- Database:** PostgreSQL, MongoDB
- Tools & Cloud:** Docker, Git, GitHub Actions, Cloudinary, Aws EC2
- Other:** WebSockets, FFmpeg, BullMQ, Clerk, TanStack Query

SOFT SKILLS

- Collaborated in a 4-member team to deliver a hackathon prototype
- Presented project architecture to faculties

PROFILE

Computer Engineering student with strong full-stack development skills(React, Next js, Node js, Express) and experience in cloud deployment & Docker.Solid foundation in DSA and problem-solving, currently exploring Generative AI and advanced language models.

PROJECTS

VideoFlow

Adaptive Video Streaming Platform

- Built a scalable video streaming platform using React.js and Express.js with smooth playback on varying networks.
- Implemented background video processing using BullMQ, Docker, FFmpeg (HLS, thumbnails, metadata extraction).
- Designed PostgreSQL + Prisma database and integrated Cloudinary for media delivery.
- Implemented real-time processing updates via WebSockets + Redis Pub/Sub.
- Dockerized complete project and deployed on AWS EC2 with CI/CD using GitHub Actions.

Tech Stack: React , Express , TypeScript , BullMQ , Docker , Redis , FFmpeg , PostgreSQL , Prisma , WebSocket , AWS

VibeStudio

Vibe Code Editor

- Developed an AI-powered UI generation platform using Next.js and Google Gemini API to create Full-Stack WebApps from text prompts.
- Implemented secure authentication, subscriptions, and billing using Clerk.
- Built a scalable backend with Prisma ORM and PostgreSQL, leveraging TanStack Query, Inngest for background jobs, and E2B Sandbox for AI agent workflows.

Tech Stack: NextJs , Clerk Billing , TanStack-Query , Shadcn , Inngest , E2B Sandbox , Prisma , PostgreSQL , Google Gemini

VideoTube

Video Platform Backend API

- Developed a production-ready REST API with 8 feature modules (users, videos, playlists, comments, likes, subscriptions, community posts, analytics) following MVC architecture with centralized error handling
- Implemented JWT authentication with refresh token rotation and secure file upload pipeline via Multer and Cloudinary for video and image assets

Tech Stack: Express , MongoDB , JWT , Multer , Cloudinary
